

SECTION D PACKING AND MARKING

D.1 SHIPPING PRACTICES

Unless otherwise specified herein items to be delivered under this Contract must be packed for shipment in accordance with the best commercial practices and in such a manner as to ensure receipt at destination without damage due to shipment. All spares must be individually packaged and placed in a protective sealed bag

The Government will arrange for all GFE NAIMES II hardware, software, and peripheral equipment or other components (hereinafter referred to as "NAIMES II workstations") to be shipped to each FAA site in advance of the Contractor's arrival.

As required, the Contractor must ship NAIMES II workstation contingency inventory to FAA sites after receiving direction from the Contracting Officer in a Task Order.

D.2 CONTROL OF GOVERNMENT PROPERTY INCLUDING STORAGE AND TRANSPORTATION

- a. Control of Government property and shipments must be made in accordance with "Contractor's Guide for Control of Government Property" and FAA Order 4650.30, "Management and Control of NAS F&E Projects/Materiel".
- b. NAIMES II components, equipment, and spares must be transported by the most economical means considering dependability, safety, urgency of need, traceability, and the use of the least costly mode meeting these considerations. All material must be shipped free on board (FOB) destination.
- c. The Contractor must be responsible for providing material handling equipment, personnel and other resources necessary for the loading, blocking, and bracing of items to be shipped, and for the on-site loading or unloading and transportation of personnel and material associated with the NAIMES II equipment.

D.3 MARKING

All NAIMES II components, equipment, and spares must be preserved, packed, and marked in accordance with ASTM-D-3951, Standard Practices for Commercial Packaging. In addition, minimum markings must include the name and address of the consignee and consignor and any applicable precautionary markings including "FOR NAIMES II PROGRAM". A packing list that provides the applicable information as listed below must be attached to each unit, intermediate, and exterior-shipping container:

- | | |
|-----------------------------|------------------------------|
| a. Serial Number | d. Contract Number |
| b. Part Number | e. Contract Line Item Number |
| c. Warranty Expiration Date | |

D.4 MOVEMENT OF MATERIEL ON SITE

The Contractor must provide the necessary and appropriate personnel including handling devices as well as floor, floor tile, and floor carpet tile protection for the transportation of NAIMES components, equipment, and spares from the shipped-to site loading dock to the designated FAA facility location for installation.
